

GET THE FULL SPECTRUM OF SUITE METERING FROM ONE CENTRAL PROVIDER

Choose water, gas, thermal suite metering or all 3 in an integrated solution, tailored for your multi-tenant buildings

- Turnkey offering delivered by the area's top electrical and power system engineers
- From design and managing the installation to ongoing customer care, our entire solution is designed for you
- Water, gas and thermal (BTU)* metering: choose as stand-alone or integrate any combination with our electricity suite metering solution
- Leverages the many benefits of Individual suite metering
- Includes system installation, commissioning, and ongoing maintenance
- Includes meter re-verification and certification at no cost
- We handle individual suite bills and collection

* Thermal meters are used to measure energy from hydronic heating and cooling systems.
